CONTAINER PRESS

RC 1100 TT

- Reduction of volume up to 75 %
- Optimal use of containers
- Saving space
- Keeping the place tidy
- Easy handling
- Minimal floor space required

**Compacts
directly into
the 1100 l
Container**

**WASTE MANAGEMENT -
WITH STRAUTMANN UMWELTECHNIK**

CONTAINER PRESS

RC 1100 TT

► Reduction of volume up to 75 %

- adjustable pressing weight up to 4 t

► optimal construction

- space saving steel construction for 1100 l containers according to Euro Norm 840/2 - 840/3 in swinging arm design
- low headroom requiemande (from 1900 mm)

► careful treatment of the container

- not loaded on rollers during pressing
- pressing force automatically limited
- easy emptying of container

► efficient operation

- easy entry of the container into the pressing frame
- fixation of container over the locking arms in the press
- ergonomic 2 hand operation
- quick pressing
- great volume by compression and refilling
- low noise, less than 75 dB

► saving space

- reduces the number of containers needed

► keeping the place tidy

- no open and overflowing containers

► to be installed everywhere

- can be installed anywhere
- low overall press height

► high safety standards

- 2-hand safety switches
- manufactured according to **CE** norms

► premium package

- 230 V / 50 Hz single phase 1,5 kW

► Options

- version for 660 l - containers
- version for 770 l - containers
- in zinc plated version for wet waste areas
- increase of pressing power for special materials (up to 8 t)
- hydraulic system on **basis of bio-oil**
- on request without automatic fixation of container and without operation from the front (see 2nd picture fr . above)

pressing weight	electricity supply	weight of the machine
3 - 4 t	230 V / 1,5kW / 50 Hz	430 kg
6 - 8 t	400 V / 2,2kW / 50 Hz	432 kg

*Attention: weight of bales depends on material!
